PREFACE

The main outcome of the previous board meeting held on February 5, 2016 was the acceptance and adoption of REDD+ Annual Work Plan for 2016 (AWP 2016).

On June 10, 2016 the follow up meeting was held to discuss the progress made thus far with the Annual Work Plan 2016. The meeting addressed the three main areas or components of the Annual Work Plan 2016 namely:

1. Strengthening human capacity and stakeholder collaboration
2. REDD+ business model and strategy
3. REDD+ implementation framework and tools

After analyzing the updates given the conclusion was drawn that the project appears to be lagging behind with regards to the targets as outlined in the Annual Work Plan. The rate of progress for the three pillars or components are below:

- Pillar I – 19.1 %
- Pillar II – 0.7 %
- Pillar III – 10.8%

It is imperative that Project meet the deadlines stipulated in the Annual Work Plan 2016. Therefore, the Management team along with the UNDP will arrange an in house meeting to address this problem.

It is the aim of the Project to have a good end of year review. Thus, Project Board Meeting will be held more frequently so that the Project Board is kept well informed as to the developments of the Project . The next Project Board Meeting is scheduled for August, 2016.

PROCEEDINGS

The Project Board meeting ran behind schedule. It commenced at approximately 9:00hrs.

WELCOME

Mr. Hoogdorp invited all to take their places and officially brought the meeting to order.

OPENING

The meeting was then chaired by Mr. Cedric Nelom who gave some brief opening remarks on what was accomplished at the previous Project Board meeting held on February 5, 2016. One of the main accomplishments of that meeting was the approval of the Annual Work Plan for 2016. At this meeting they will review the accomplishments based on the planned actions as outlined in the Annual Work Plan 2016 and the way forward.

ADOPTION OF THE AGENDA

The Project Board members were given a few minutes to review the Agenda items to see if there is need for additions or suggestions. None were given. The chairman, however, did ask that due to the late start that the break be postponed to the end of Update on Pillar III presentation.

REVIEW OF THE PROJECT BOARD MEETING MINUTES DATED 05 FEBRUARY, 2016 AND THE ADOPTION OF THE MINUTES.

Electronic copies of the Project Board meeting minutes dated 05 February, 2016 was sent to each Project Board member two weeks in advance. Hard copies of the document was also available to each Project Board member.

The chairman reviewed the layout of the minutes and then allowed for comments and remarks to be made on each item in the document.

The following suggestions were made:

- Typo error - The answer should be *forest information* and not *forestry information* as is seen in the answer to the first question found in the Question and Answers section of the Projects Board Meeting Minutes February 5, 2016.
- Typo error – the abbreviation NMFS should be NFMS found also in the Question and Answer section of the Project Board Meeting Minutes February 2016.
- For future reports the question and answer section should be numbered.
- Need for consistency with font type, font size, abbreviations etc..

The minutes were then adopted.

GENERAL FRAMEWORK OF THE 3 PILLARS ¹

Ms. Ramdin gave an overview of the results and challenges the project has faced for the first two quarters. These are as follow:

Results

- REDD+ had a successful Audit for 2015. The auditor requested that payments be done in a timely manner especially at the end of the year (payments should not go over into a new year).
- Three new staff were added to the team namely; Marlon Hoogdorp (Communications Officer), Sara Svensson (REDD+ Officer) and Eric Sostorjoedo (logistic officer).
- SBB updated the forest cover and deforestation maps and they are now available to all the Government Ministries.
- NFMS had hired a consultant but recruitment of a local consultant would be done since Suriname has the human capacity.
- Outreach programs were done in Kwinti and Galibi with the help of Conservation International.
- Drafting of the Terms of Reference and Contracts for REDD+ Assistants Collective were done so that these can be deploy.

Challenges

- Economic crisis in Suriname.
- Administrative Procedures.
- Communication of the REDD+ Mechanism and its potential.

UPDATE PILLAR III: IMPLEMENTATION FRAMEWORK AND TOOLS²

Ms. Miranda explained that although Pillar III is under consideration some of the activities in Pillar II are also included. In this presentation eight milestones were discussed. These were:

1. Roadmaps
2. Activity data
3. Emission factors
4. Deforestation map
5. Drivers of Deforestation study
6. Forest Reference Levels
7. National forest Inventory Proposal
8. National Forest Monitoring System database and geoportal.

¹ For presentation refer to Appendix I

² For presentation refer to Appendix II

UPDATE PILLAR II: REDD+ STRATEGY ³

Ms. Mohabier presented on the second pillar. In her presentation the areas stated below were discussed.

- REDD+ overall
- Relationship between background studies and REDD+ strategy
- Status of background studies
- Stakeholder analysis
- Output brainstorming session REDD + strategy
- Next steps

Ms. Mohabier asked that the Project Board members fill out the *Questionnaire*⁴ which was among the documents they had received.

UPDATE PILLAR I: HUMAN CAPACITIES AND STAKEHOLDER ENGAGEMENT REDD+ STRATEGY ⁵

Mr. Hoogdorp gave this presentation. It was highlighted that a lot of stakeholders are already involved but the process is an ongoing one. Since this is the case the process is constantly under evaluation to measure the effectiveness and efficiency of the process.

The plan of action, therefore, is as follows:

- Evaluation of the efficiency and effectiveness
- Concrete description of the expected contribution
- Establish concrete goals
- Achieve better interaction

DISCUSSION

QUESTION AND ANSWER

1. Any updates on the Sipalawini training?

No not as yet. But it will be resolved in the future.

2. Is there a representative for the Locono people?

Discussions were done but it's still a work in progress.

³ For presentation refer to Appendix III

⁴ For Questionnaire refer to Appendix IV

⁵ For presentation refer to Appendix V

3. **What is the Government involvement in the REDD+ project? Are they really interested in the project? It is the opinion of many that the Government has a negative view of the project and as a result they are giving little or no support. This is clearly seen in the matter relating to Land Rights.**

It was explained that such views are misconceived. The government is very much involved and is supporting the project. However, the current system and laws that are used by the government may be out dated and correcting these problems will take time. REDD+ is the cart wheel behind such issues as Land Rights, Community forest etc...

4. **Many studies were done. Should the results from these studies be seen? For example what are the main causes of deforestation in various areas?**

SBB do have such information on paper and this information is forwarded to the Government who can then make policies.

5. **There is need for more representative for all districts and communities. Reference is being made to the DR and RR but these are not present in all communities especially the interior. What should be done?**

The DR and RR are the means by which the government used to decentralize information. It is the community who selects and vote these representative in. Therefore, the community should use these mechanisms once they are in place. If the system isn't working then reports can be made to the Ministry of Regional Development where a re-evaluation can be done as to how to better the system.

6. **The advice given by the Ministry of Regional Development is not binding. Does this mean that the advice can be ignored or by-passed?**

The Ministry of Regional Development gives advice and in some cases a variety of options are given but it is left on the community to decide what to do. The Ministry is interested in the sustainable use of the forest. For example the community can be given two options to use the forest for wood or agriculture. The choice is theirs but the advice was given.

The Ministry is not the only organization that gives advice that is not binding.

7. **Would the studies scheduled for the rest of the year be desktop studies or field studies and would the results of these studies be added to the REDD+ Strategy?**

All studies will be conducted with stakeholders in the field.

The REDD+ strategy should be finalized by the second quarter of 2017. Before results of the studies are added to the strategy it must first be discussed.

8. **Why is an International consultant needed to do the Corruption Risk Assessment Study?**

It is best to use a neutral person to do this study so as to have an impartial analysis. Point to note is that the International consultant will work along with a Local consultant.

- 9. REDD+ Assistants are not satisfied with the treatment that they are receiving. They are doing their work but they have no authority behind them. They preach conservation but at the same time permits and concessions are given for the misuse of the forest. Who has our backs?**

REDD+ are aware of these matters. Arrangements are in place to review the work of the REDD+ Assistants and also the financial aspect. The project promises that a change would come but there is need for faith and patience.

COMMENTS / AGREEMENTS

- UNDP expressed concerns on the progress made by the Project to date. The progress update when compared with deliverables as are highlighted in the Annual Work Plan 2016 the figures are shocking. The deliverables are 19.1% for Pillar I, 0.7% for pillar II and 10.8% for Pillar III.

The Project Board and the Management of the Project need to keep a careful eye on these issues and address them. The Project Board needs to hold the project accountable for the deliverables.

Why are the results so low? Is there a possibility that the project has overestimated the cost, are the result being achieve at a cheaper rate or the work is not moving at the pace it should.

If the donors are not satisfied then we jeopardize the Project, UNDP and the Government.

- The Project Manager highlighted that in the first quarter the project had a bit of a rough start but now with the addition of new personnel and more to come the project should come on schedule.
- Main benefactors of the deforestation activities are the Government , the Maroons and the Business sector. It was recommended that the Business sector be more involved in the issues affecting REDD+ project.
- A time schedule of Project activities should have been included in the presentations. It was suggested that presenters draft up a report showing dates and the timeline for the various activities.
- Consideration should be given to the form of communication that would be used to reach persons in the interior since many of the methods mentioned are not applicable to them.

- Proper handing over of duties should be done when an employee leaves. If the employee has personnel or clients under his / her care these should be informed as to who would be his / her replacement and a proper introduction be given.
- Mr. Hoogdorp was assigned to arrange a meeting with the REDD+ Assistants and the representative of Regional Development to discuss the issues affecting the REDD+ Assistants.
- Farewell was in order for Mr. Jerrel Pinas. However, the curtains are not fully down with his new post at WWF he would be working closely with other REDD+ project thus he can share the knowledge learnt.

COMMENTS FROM THE ROUND TABLE.

- Non-Governmental Organization representative promised to send two letters dealing with subject matters: 1 Community forest and 2 Scattered grounds transferred to agricultural purposes. These letters will be sent to NIMOS and UNDP.
- In an effort to improve the results of the REDD+ project as outlined in the Annual Work Plan 2016 representative of NIMOs and UNDP will meet to see what are the obstacles that are keeping the project back.

CONCLUSION

In closing the chairman suggested that the next Project Board meeting be scheduled for August 2016. At the follow up meeting it is hoped that the following matters are discussed:

- Update on what the Project has done.
- Pressing matters
- Things hindering the Project.

The meeting was adjourn at approximately 14:30 hours.
